

RC650-2

Rain to Mains System w RC060 & Cover

PREMIUM TRADE QUALITY

RC650-2 is the RC450-2 rain to mains water diversion unit (with Rain & Town RC060 Constant Pressure Jet Pump) with the added advantage of a pump cover. No cables, no float, no solenoid, no electronic controls! Kit comes complete with cover and flexible hoses. The RC650-2 stops the flow of mains supply while rain water is being pumped to help conserve our precious resource. This system is only suited to flooded suction and is best suited for supplying laundry and toilets only. Pump covers available in a variety of colours to match most standard tank colours.
