

# RC750-2

## Rain to Mains System w RC060 & Cover

### PREMIUM TRADE QUALITY

RC750-2 is the RC450-2 unit with the added advantage and protection of a durable pump cover. The mains changeover system has no cables, no float, no solenoid, no electronic controls. Kit comes complete with cover and flexible hoses. The RC750-2 restricts mains supply while rain water is being pumped to help conserve our precious resource. This system is only suited to flooded suction and is best for supplying laundry and toilets, and small houses & cabins (1 bathroom). Pump covers available in a variety of colours to match most standard tank colours. For suction lift and underground tanks, use submersible pump option RC550-2.
